TENACITY Final Pilot & Conference: "Strengthening Security & Resilience"

In this third edition of the TENACITy newsletter, we are excited to present key details about the project's Final Pilot & Conference, "Strengthening Security & Resilience," taking place on June 25, 2025, in Brussels. A pivotal moment that highlights the achievements of the TENACITy consortium and showcases the impact of our work. As a valued subscriber who joined our community through the official website, you're part of this journey. In this issue, you'll find an overview of what to expect at the upcoming event, along with a reflection on the major project milestones to date.

About the TENACITy Final Pilot & Conference

As the TENACITy project reaches its final stage, the upcoming Final Pilot & Conference marks a pivotal moment, not only to present our outcomes but to highlight the collective innovation and commitment of our partners. This milestone event embodies our vision for advancing travel intelligence, enhancing data governance and reinforcing security across Europe.

Since its beginning, TENACITy has brought together law enforcement agencies, Passenger Information Units (PIUs), policymakers, researchers and ethics experts to co-develop a comprehensive Travel Intelligence Governance Framework. This framework combines advanced IT architectures, cutting-edge digital tools, legal and ethical safeguards, training curricula and citizen-focused approaches, all designed to enhance

crime prevention, travel intelligence and decision-making for European security authorities.

This is more than the conclusion of a research effort, it's a celebration of shared progress and a platform for looking forward to the future of collaborative security and smart travel intelligence.

What to Expect

Live Tool Demonstrations
Experience hands-on showcases of the digital tools developed through TENACITy's cutting-edge research.

Final Pilot Showcase
See real-world applications of the TENACITy platform through a live demonstration of the final pilot.

Expert Talks
Gain valuable insights from thought leaders and innovators shaping the future of travel intelligence and security.

Stakeholder Engagement
Engage with policymakers, law enforcement, researchers and civil society in interactive discussions.

Networking Opportunities
Connect with experts, share knowledge and build partnerships for future collaboration.

A Look Back: TENACITy in Action

Throughout the project's duration, TENACITy has actively engaged stakeholders through a wide range of events, from hands-on workshops and pilot demonstrations to expert roundtables and high-profile conference participation. These moments have not only showcased our technological developments but also fostered cross-border collaboration, end-user engagement and real-world validation of our solutions. Here are some of the key highlights:

1st Training & Living Lab Workshop

Held early in the project, this workshop enabled PIUs and LEAs to interact with initial versions of TENACITy tools. Realtime feedback sessions helped refine functionalities at an early stage.

Read More.

1st Pilot Demonstration

A two-day pilot in Cyprus tested operational scenarios using TENACITy tools. Law enforcement professionals engaged in technical validation and scenario-based exercises, followed by a structured feedback roundtable.

Read More.

TENACITy 3rd Plenary Meeting

Consortium partners gathered in Brno for two days of in-depth discussions, planning, and collaboration. The meeting covered progress across all work packages and mapped out the final steps ahead of the project's conclusion.

Read More.

End-User Workshop

Designed to tailor the platform to real operational needs, this session focused on co-developing integration strategies with end users. Discussions centered

on aligning with national workflows and enhancing usability.

What's Next? Final Newsletter Ahead

Following the Final Pilot & Conference, we'll share one last newsletter dedicated to the key outcomes of the event and the overall achievements of the TENACITy Project. It will feature final results, insights from the piloting phase and exclusive interviews with partners who contributed to the project's success.
