

TENACITY has received funding from the European Union's Horizon Europe research and innovation programme under grant agreement No 101074048

TENACITY

Travel Intelligence Against Crime And Terrorism

TRAVEL INTELLIGENCE

TENACITY will propose an interoperable open architecture for the integration and analysis of multiple data from a variety of sources, by exploiting game changing digital technologies.

MODERN TOOLS

TENACITY envisions training tools through living labs to organize hackathons, workshops for all relevant stakeholders who would benefit from the implementation of modern concepts and the use of digital technologies.

LIVING LABS

A Governance Framework that will incorporate a holistic approach to crime prevention, ensuring that technology will identify the modus operandi of criminal and terrorism organizations.

ABOUT TENACITY

TENACITY aims to enhance travel intelligence for fighting crime and terrorism in the European Union.

Its vision was born as a Travel Intelligence Governance Framework that will incorporate a holistic approach to crime prevention, strengthening the intelligence, the analytic capacity and the decision-making of the security authorities. More specifically, this vision in fighting serious crimes and reinforcing the position and the cooperation of authorities will be achieved through modern and effective tools for exploitation of travel intelligence data, and through training and sensitization of law enforcement personnel.

Project Milestones

TENACiTy Training & Living Lab Workshop

The Living Labs are strategically divided into three key thematic sections:

- 1.Pre-Pilot Functionality Assessment
- 2.Stakeholder Engagement and Training
- 3.Innovation Diffusion

TENACiTy 1st Pilot

- Pilot TENACiTy using use case scenarios to ensure effective implementation.
- Provide training before, during, and after pilots for thorough end-user preparation.
- Collect and analyze end-user feedback for continuous system refinement.
- Conduct a regulatory and legal assessment to ensure API/PNR compliance.
- Test system functionality and ensure legal and regulatory robustness.
