

TENACITY

Training Platform

What It Is?

The TENACITY Training Platform is a dedicated online learning environment developed to support the project's mission of strengthening travel intelligence capabilities across Europe. Built on the Moodle system and tailored by IANUS Technologies, the platform hosts training courses that guide law enforcement practitioners and other end-users through key concepts, tools, and real-world scenarios.

Key Features

Designed to be practical and accessible, the platform combines:

Self paced & live sessions

Quizzes & evaluations

Multimedia material

Scenario-based training

Law enforcement focus

TENACITY suite of tools familiarisation

Course Topics

- Travel intelligence as a framework for combatting organised crime
- Pattern identification
- Risk management
- OSINT
- Use of blockchain for secure information sharing.

Platform Usage Snapshot

68 Trainees* **19** Instructors **3** Admins

Total Users: **90**

*Trainees were only people from PIUs, airlines and competent authorities across Europe.

A Lasting Contribution

By providing a structured yet flexible space for training, the platform has helped build a shared understanding among diverse end-users, promote interoperability, and encourage feedback that will refine future tools and practices. As an outcome of TENACITY, the training platform will remain a valuable resource, ready to be shared with wider law enforcement networks to support ongoing capacity building in counter-terrorism and organised crime prevention.

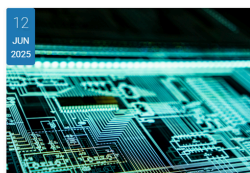

Training Materials Used

- Text documents explaining the tools (user manuals)
- Descriptions of the training curricula and agendas for the training activities (text files)
- TENACITY scenarios (text file)
- Instructive videos of the tools, presentations
- Quizzes and evaluation forms
- External links of additional material (relevant public videos and documents)
